

An Industrial Education Seminar

Compressed Air Systems Seminar

How To Get More Air At Lower Cost

ZEKS
COMPRESSED AIR SOLUTIONS

Hosted by **AIM Power and Fluids, Memphis**
in conjunction with ZEKS Compressed Air Solutions.

Presented By Hank van Ormer
President, Air Power USA

This one-day seminar will help those with compressed air systems of any size understand best practices for operating and maintaining their systems. Attendees will learn practical ways to:

- **Reduce compressed air cost**
- **Improve air system reliability**
- **Increase productivity**
- **Develop effective leak control**
- **Use less air in production processes**

Mr. van Ormer brings to this seminar more than 30 years experience and knowledge gained in over 2200 air system audits and reviews. He has worked with leading compressor manufacturers in product development, sales and technical roles. He started Air Power USA to help companies better understand their compressed air systems and implement programs to reduce energy waste. Mr. van Ormer has developed several accredited training courses and is a founding member of the Compressed Air Challenge Program initiated by the Department of Energy.

AIM Power and Fluids has been a distributor of high quality Air, Gas, and Liquid Handling and Treatment Equipment for more than 40 years. The company specializes in innovative engineering solutions for problems across a wide range of industries. With modern facilities in four strategic locations and a full line of the finest products available, AIM is committed to providing high quality sales and service now and for years to come.

ZEKS Compressed Air Solutions is a leading manufacturer of compressed air treatment equipment. The company has introduced many innovations that reduce the costs associated with operating air systems while improving production efficiency.

SEMINAR DETAILS

DATE: **April 17, 2012** (Tues.)
TIME: **8:30AM - 4:00PM**
LOCATION: **Marriott, Memphis**
2625 Thousand Oaks Blvd.
Memphis, TN 38118
FEE: **\$125 per attendee**
Includes: Seminar; Workbook;
Buffet Lunch
REGISTER: **Contact DAVID HOLLIS**
PHONE: **901-363-2200**
E-MAIL: **dthollis@aimcompanies.com**
Payment by credit card or company check

Who Will Benefit From This Seminar?

Plant Engineers/General Managers/Owners

- Understand air system operating cost
- Identify the best equipment to install
- Apply innovations and new technologies
- Create guidelines for system design

Maintenance/Service Personnel

- Develop effective maintenance programs
- Diagnose common air system problems
- Set up energy conservation programs
